## Personal Profile

Experienced professional dedicated to team and community. Proven ability to work independently and as part of a team, and to effectively communicate with a variety of stakeholders. Strong skills in research, writing, analysis, collaboration, and technical skills for Web and Mobile Development

History of providing insight and being decisive in helping others meet goals. Through active listening, I am able to accurately identify the root of problems and develop effective solutions. Looking for a full-time Software Engineer role.

## Work Experience

### ProgressNow

Remote

#### Mobile Engineer

September 2023 - Present

- Responsible for the mobile development of ProgressNow's mobile application for updates of the iOS app and development of the Android app. Using Kotlin, Jetpack Compose, Retrofit, and Daggerhilt, MVVM is used for Android development. Swift and UIKit for iOS development.
- Used code as documentation to build a counterpart Android application. Managed development and time effectively to meet tight deadlines. Using Github for code management
- Implemented error handling for stability. Used Sentry to log errors to the system. Integrated legacy WebOauth authentication into the app, ensuring a smooth and secure user login process.
- Participated in code reviews for iOS, Android, and Web. Communicated with stakeholders about users and their expanding needs.

### Plumbum Writers' Workshop

New York, NY

#### Founder-Leader

April 2023 - Present

- Organizing, planning, and promoting successful writers' workshops for aspiring writers of various skill levels and backgrounds.
- Facilitate engaging workshops, ensuring a welcoming and inclusive environment for participants. Providing individualized group critique and individualized feedback by actively reading and listening to work; helping writers develop their ideas so they meet their goals; helping them achieve their writing goals.
- Developing and implementing workshop materials, including writing exercises, prompts, and resources, creates moments to build confidence as a writer. Community management of 14 people and new attendees, adapting and teaching as needed.
- Developed an Android native mobile application using Kotlin, Jetpack Compose, DaggerHilt, MVVM, and Gitlab. Now on the Google Play Store. Developing web applications using React, Redux, Firestore, and FirebaseAuth for data handling
- Play Store:** [play.google.com/store/apps/details?id=com.plumbum.pb\\_android](https://play.google.com/store/apps/details?id=com.plumbum.pb_android)

### Quantum Health

Remote

#### Android Engineer

June 2022 - March 2023

- Provided guidance on complex product development projects, with a focus on revamping an existing product.
- Developed features for assigned projects and assisted in the development and implementation of the product. The team used Jira and followed an Agile methodology.
- Created documentation as code for testing purposes on a GitHub pull request. On Confluence, I created the needed documentation for new developers to make onboarding easier.
- Wrote unit tests in mockk, and implemented Gradle script CI testing of line coverage with Kover, debugged code, and implemented error handling to improve stability. I wrote documentation and steps to replicate work for code reviews and to improve processes.
- Took part in exitamigos, worked with a business analyst and quality engineer to critique and verify implementation. Presented code demos and took part in daily stand-ups.
- Developed new features for the revamp application using Jetpack Compose, Retrofit, and Dependency Injection, following MVVM. Used AndroidViewBinding to include legacy code and remake native features.

## Education

### Syracuse University

Syracuse, NY

#### BA in English and Philosophy

Class of 2019

- Courses:** Critical Writing, Critical Research, Logic, Computing, Statistics
- Extra Curricular:** Syracuse University Outdoors Club, Obscure Film Society, Write Out, Meals on Wheels
